DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 15 July 2005 with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 11-21 rejected under 35 U.S.C. 102 (b) as being clearly anticipated by Tahara et al. (US Pat. 4,642,314 or US Pat. 4,738,801).

Both US'314 & US'801 teach compounds which read on amended claim 1 wherein R is a hydrocarbon functional group derived from a fatty acid having 14 to 22 carbon atoms and the use in formulations.

Introductory language of a claim drawn to a process of using the composition does not constitute a new use since the old composition possessed the property and applicants merely discovered this property. In re Tomlinson, 363 F.2d 928, 150 USPQ 623 (CCPA 1966). Also, the recitation of the intended utility into the preamble of a compound claim which can

Art Unit: 1621

otherwise stand alone, is not considered a further limitation of the claims and does not impart patentability to a known composition

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 5-10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 5-10 recites the limitation "isoprenoid fatty acid ester has 2 to 30 atoms" in the definition of R. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 has been amended to read on an R group wherein the hydrocarbon functional group derived from a fatty acid ranges from 14 to 22 carbon atoms. Therefore, there is no antecedent basis for claim 5 and its dependent claims wherein "R" contains 2 to 13 carbon atoms.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
